

## 2nd webinar and the evaluation meeting in Madrid

*On January 27, 2022, the second webinar of the ProCKD project was held. The topic of the webinar moderated by Universidad University Autonomous Madrid and Federación Nacional de Asociaciones ALCER was the integration of people with chronic kidney disease (CKD) into the workforce. In particular, the webinar focused on the analysis of the impact of employment and CKD-related emotional factors on quality of life.*

*After, Pro-CKD project partnership met again in Madrid on 9-10 May 2022. The meeting hosted by Nacional de Asociaciones ALCER was attended by EPI-ONI and Saronic Nephrological Center Ltd from Greece, Istanbul Gelisim University from Turkey, Dutch Foundation of Innovation Welfare 2 Work from the Netherlands and University Autonomous Madrid from Spain. At the meeting, the success of the project activities was evaluated and the roles of the partners in the project were reviewed. After the meeting, the participants witnessed the cultural richness of Madrid with my ALCER.*

# Pro-CKD partnership met in Athens for the final meeting of the project

*On 18 November 2022, the 3rd Webinar of the project was held under the moderation of University Autonomous Madrid from Spain. The topic of the webinar was "Quality of life and productivity". Miguel Ruiz, professor of Social Psychology and Methodology, and Javier Rejas, expert in pharmacoeconomics, presented information on how to measure the quality of life perspective for kidney patients and make pharmacoeconomic calculations based on it.*

*On 7-8 October 2022, the project partnership met for the last time in Athens to finalize the project. At the meeting hosted by EPIONI, all activities from the beginning to the end of the project were reviewed and the achievements achieved during the project were discussed. In closing the meeting, the partnership decided to develop the second step of the project. In the upcoming period, with a new project, we will try to find solutions to the socio-economic problems of kidney patients, which we have brought to the agenda with the Pro-CKD project.*
